

Flora Laszlo
Director, Civic Engagement,
Arts and Culture Unit
Central European University

The Science Shop provides
independent research support
in response to concerns
experienced by **civil society** ...
...aiming to close the gap between
academic disciplines and practice,
through solving **real-life problems**

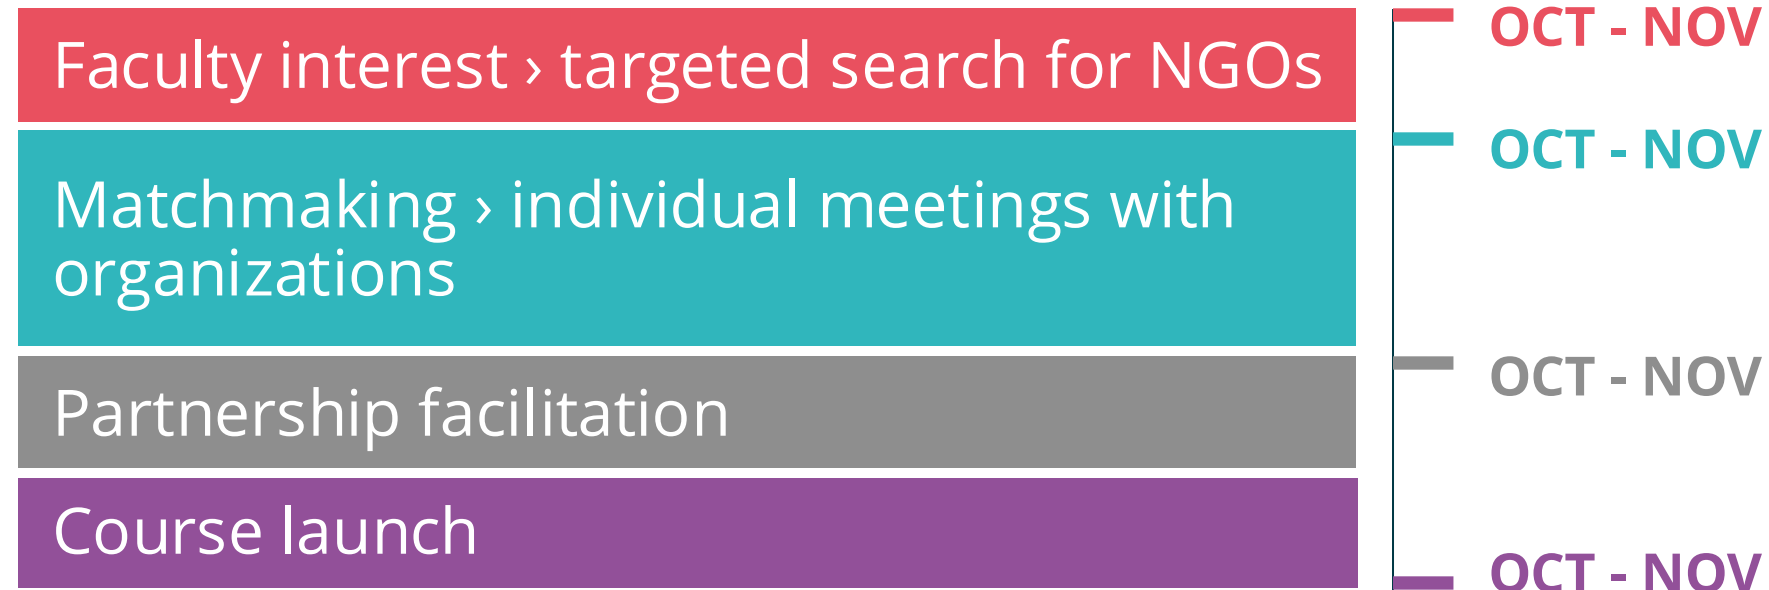

Open Science, Citizen Science,
Engaged and Service Learning, Civic
Engagement and Community Based
Participatory Research are the flagship
practices that define our work.

ETHOS

„Open door“, bridge, translate and connect. Break the „ivory tower“ (mentally and physically). Local community in focus. The research question comes from them. For those who cannot afford it.

COURSE PROJECTS

timeline

STUDENTS' PERSPECTIVE

how to engage

1. COURSE PROJECT

take a course with a “science shop” student project element

2. THESIS WORK/INTERNSHIP

signal us your interest that you want your thesis to make a difference, and we look for the organization of your cause / topic

3. INDIVIDUAL CAPSTONE PROJECT

if your endeavour is **extra-curricular**, we can connect you with community partners to learn and engage

Previous co-operations between students and CSOs related to environmental issues

Thesis work: Bursting the "bubble" of Environmental Activism: The role of framings and cultures in creating more diverse and inclusive Austrian environmentalism.

Internship: @SEEK Feminist Research Network. Student tasks: 1, Helping with the design of SEEK's social media campaign on climate migration. 2, Challenges associated with migration as a form of climate change adaption in coastal communities in Liberia
